SQL for Data Science

Data Wrangling, Analysis and AB Testing with SQL

Distributed Computing with Spark SQL

SQL for Data Science Capstone Project

Dec 13, 2022

CARLA AMOI RUDDER

has successfully completed the online, non-credit Specialization

Learn SQL Basics for Data Science

This Specialization is intended for a learner with no previous coding experience seeking to develop SQL query fluency. Through four progressively more difficult SQL projects with data science applications, you will cover topics such as SQL basics, data wrangling, SQL analysis, AB testing, distributed computing using Apache Spark, and more. These topics will prepare you to apply SQL creatively to analyze and explore data; demonstrate efficiency in writing queries; create data analysis datasets; conduct feature engineering, use SQL with other data analysis and machine learning toolsets; and use SQL with unstructured data sets.

Sadie St. Lawrence, AI Strategy Consultant; Katrina Glaeser, Data Scientist at Marco Polo; Brooke Wenig, Machine Learning Practice Lead at Databricks; Conor Murphy, Data Scientist and Consultant at Databricks; Don Noxon, Information Technology Research Data Scientist at Intel Corporation
